In the Matter of:)
)
Reexamination of the Comparative) MM Docket No. 95-31
Standard for Noncommercial)
Educational Applicants.)

MOTION FOR RECONSIDERATION

The petitioner does hereby request that the Commission reconsider the SECOND REPORT AND ORDER. Contained within the Pending Applications section was the following two sentences:

1) "As a result, we believe that it will serve the public interest best to return as unacceptable for filing the pending applications for NCE stations, and move the process forward by subjecting any remaining mutually exclusive applications to auction."

2) "Prior to auction, we will not review these applicants' long form applications already on file, nor will we accept amendments to these forms, including any amendments to change an applicant's status from NCE to commercial."

The Commission should allow the NCE applicants an opportunity to change the status of their pending application from NCE to commercial and then to be allowed to participate in the auction. This would not unduly delay the resolution of all the current pending applications and may even accelerate the initiation of new broadcast service by avoiding another legal appeal.
